SUMMARY

Software Development Engineer with 2+ years of experience building scalable cross-platform mobile apps for Android and iOS using Flutter. Skilled in native platform integrations, reusable architecture (BLoC/Redux), CI/CD optimization, and performance tuning. Actively expanding expertise in native Android development with Kotlin and Jetpack. Experienced working in Agile environments with sprint-based delivery, mentoring developers, and independently driving features from development to release.

EXPERIENCE

SDE - 1 | Rootquotient, Chennai, Tamil Nadu

Jun 2024 – Present

- Architected secure, scalable Flutter apps across 5+ mobile products; remediated VAPT vulnerabilities for a fintech application.
- Mentored junior developers, conducted PR reviews, and collaborated with cross-functional teams to deliver production-ready features.
- Conducted on-device LLM PoCs using MediaPipe and LiteRT LM, benchmarking latency and feasibility vs. cloud-hosted models.
- Adept at bridging native platform capabilities into Flutter via Method Channels, including payments integration and third-party SDK embedding for both Android and iOS.
- Optimized networking with Hive-backed interceptor caching, reducing average load times by 30–40%.
- Engineered real-time live dashboard streaming via WebSockets across multiple concurrent data sources.
- Built cross-platform geofencing PoCs for Android & iOS across foreground, background, and terminated states.
- Authored reusable CI/CD pipeline templates with Gradle/CocoaPods/Flutter dependency caching, cutting build times by ~30%.
- Maintained 80–90% test coverage; diagnosed and resolved crashes and ANRs to ensure production stability.
- Extended delivery to Flutter Web with responsive design, ensuring consistent UX parity with mobile.
- Implemented push notifications, deep linking, managed Play Store/App Store releases, and leveraged AI-integrated development workflows and tooling to accelerate feature delivery and improve code quality.

SDE – Intern | Rootquotient, Chennai, Tamil Nadu

Jun 2022 – Jan 2023 & Dec 2023 – May 2024

- Contributed to 4+ production Flutter apps, developing UI components, integrating REST APIs, and implementing path-based routing using GoRouter; debugged performance issues following best practices in modular architecture.
- Worked with Redux & BLoC state management; built professional delivery workflows through sprint planning, ticketing systems, and Agile practices.
- Engaged directly with clients to gather functional and technical requirements, translating them into well-scoped, production-ready features aligned with business goals.

SKILLS

Mobile Development: Flutter, Dart, Kotlin, Swift, Compose, BLoC, Redux, Coroutines, Flow, Hilt, Room, Hive, Dio, GoRouter

Web & Backend: React, Node.js, Express.js, JavaScript, TypeScript, REST APIs, MongoDB, Mongoose, MySQL, CSS, Tailwind CSS, Python.

Tools & Practices: Git, CI/CD Pipelines, Automated Testing, VAPT Remediation, OOPs, MVVM, Android Studio, Xcode, Firebase Analytics & Crashlytics, FCM, Postman, MCP, Automated Agent Skills

PERSONAL PROJECT

FitSync – Native Android Workout Management Application

[GitHub ↗](#)

- Built an offline-first workout planning and reminder app with secure token storage via EncryptedDataStore and AlarmManager-based notifications with snooze support.
- Developed the backend with JWT-based auth, session interceptors, and a sliding window algorithm for API rate limiting.

Built With: Kotlin, Jetpack Compose, MVVM, Hilt, Room, OkHttp, EncryptedDataStore, Node.js, Express.js, TypeScript, JWT, AlarmManager

EDUCATION

Coimbatore Institute of Technology

2019 – 2024

Integrated M.Sc. in Artificial Intelligence and Machine Learning | CGPA: 8.44

CERTIFICATIONS

Introduction to Model Context Protocol [View Certificate ↗](#)

Anthropic | Jun 2026

Introduction to Agent Skills [View Certificate ↗](#)
